"They work so well, trucks practically guide themselves in without damaging our docks!"

"GUIDING LITE"™ DOCK REFLECTORS

☑ Improves Dock Safety

The most effective method for safely guiding trucks into the proper position at the dock area.

☑ Durable, Long-Lasting Construction

30" or 20" convex 14 gauge galvanneal steel design using superior **retro-reflective** intensity film with maximum microprism brightness to provide unbeatable day and night guidance for trucks.

☑ Superior, Cost Effective Design

Requires no electricity to operate and has no bulbs to burn out.

☑ Easily Installed

Mounts on wall under dock bumper in minutes.

"The first pair we ordered works great. Here's our order for eight more pairs."
