

Sensor Applications

OPEN UP NEW HORIZONS

Gate Operation and Safety Devices

Parking and Traffic Control

Your solutions

Falcon

- Uni or bi-directional sensing
- Discriminates between pedestrian and vehicular traffic
- High immunity to electrical and mechanical interference; NEMA 4 construction
- Easy to mount; Remote control adjustable

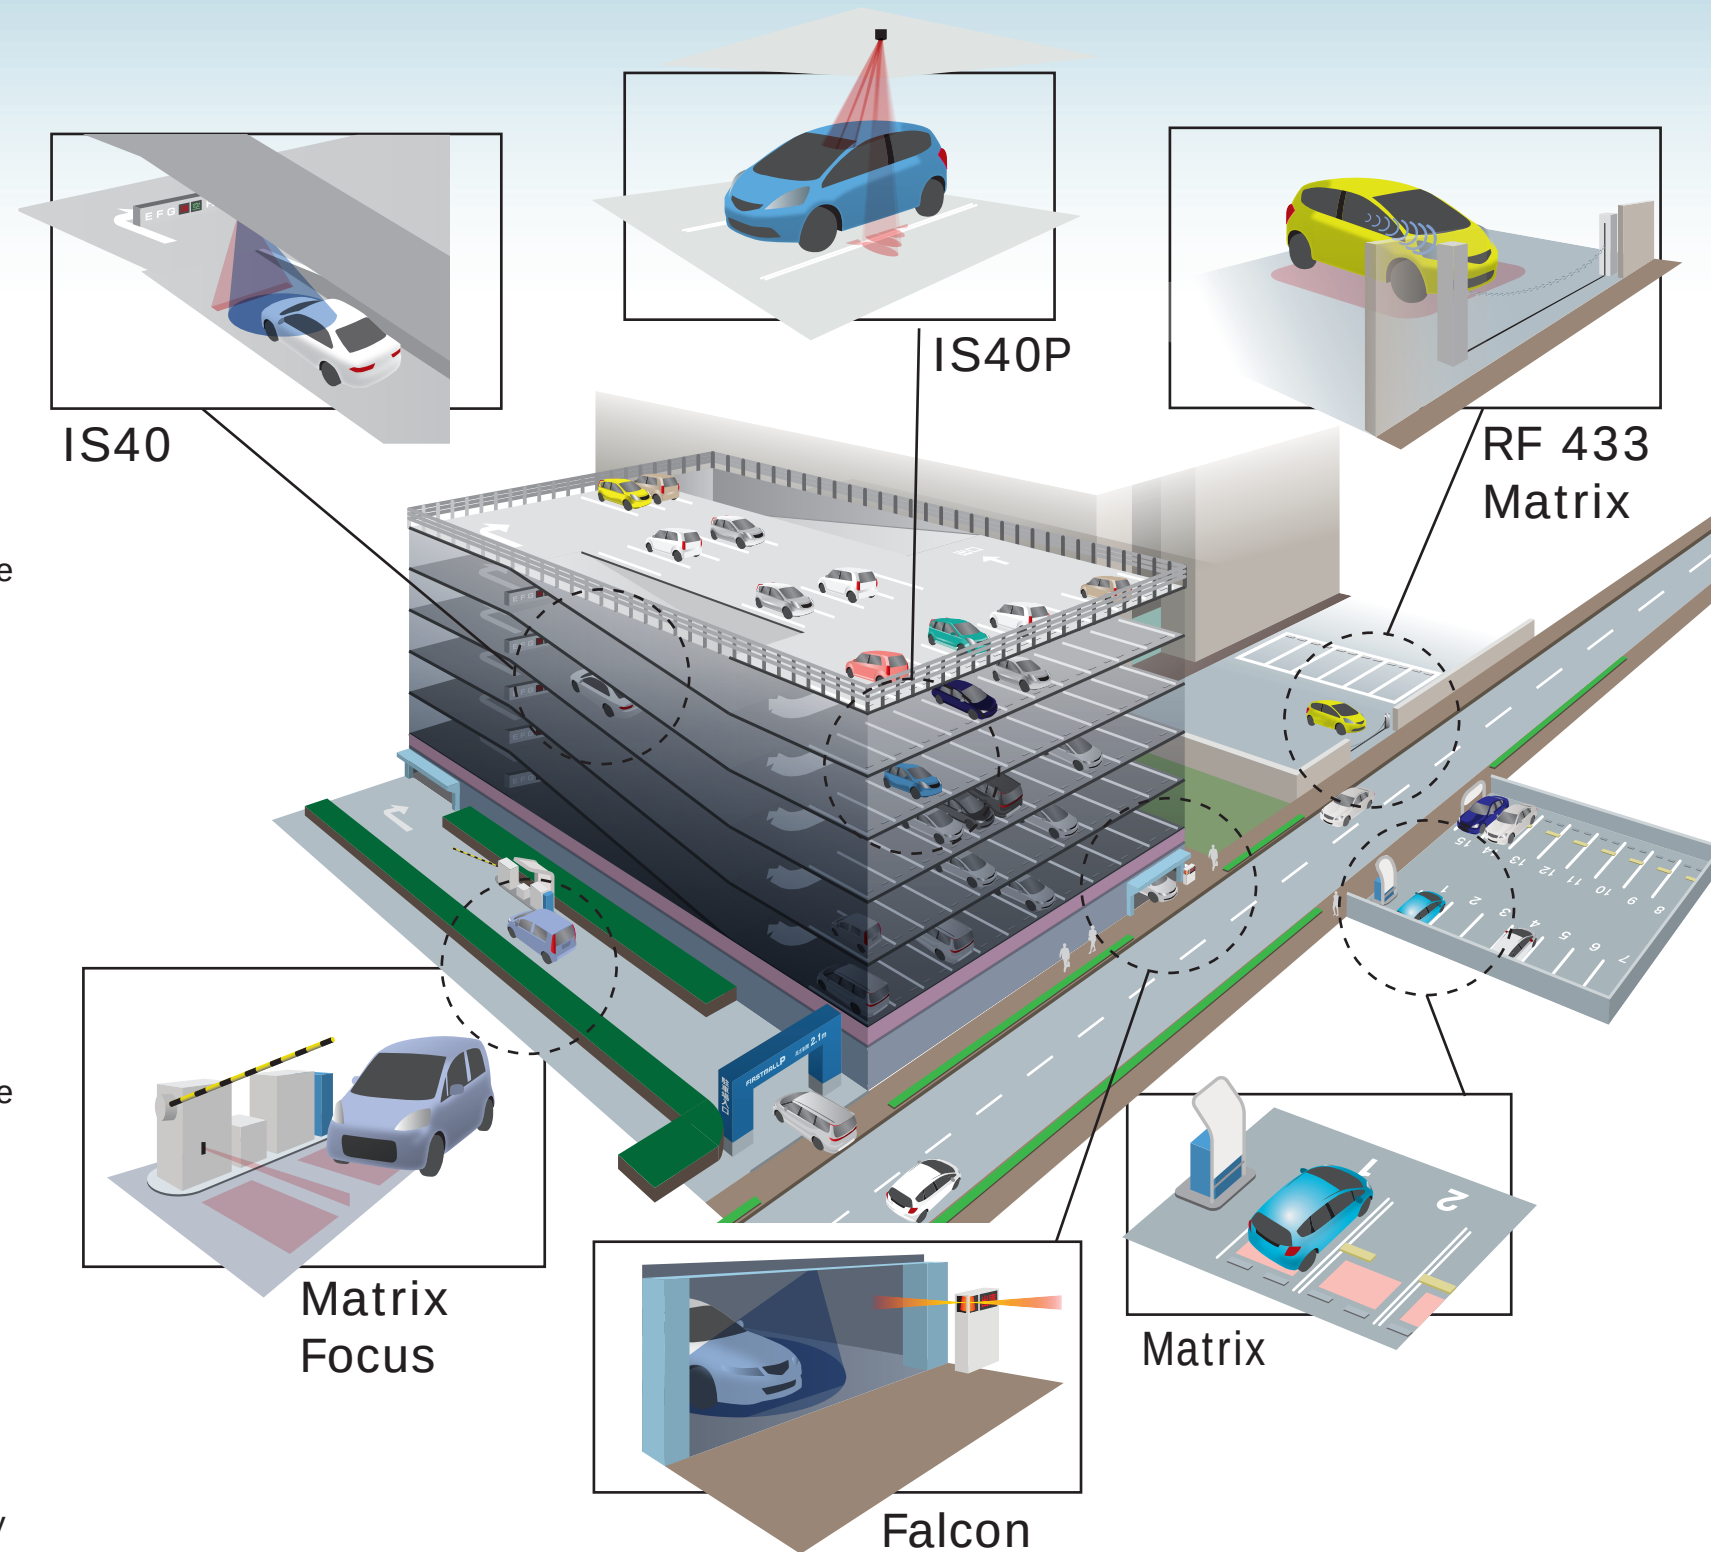

IS40P

- Active infrared sensor for precise presence detection
- Detection is based on target size
- Impervious to vibrations, light, sun, rain, or snow; NEMA 4 construction
- Easy to mount; Remote control adjustable
- Virtual loop detector

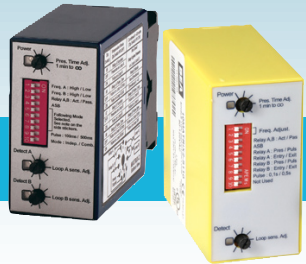

IS40

- Active infrared and microwave technology for precise presence and accurate motion detection
- Discriminates between pedestrian and vehicular traffic when properly adjusted
- Impervious to vibrations, light, sun, rain, or snow; NEMA 4 construction
- Easy to mount; Remote control adjustable

Your solutions

Matrix

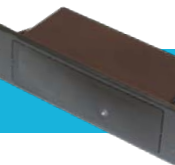

- The Matrix reboots itself automatically whenever power outages occur
- 110/120 VAC or 12-24 VDC models available; UL Listed
- 4 frequency settings ensure no crosstalk between adjacent loops
- Allows for continuous detection of high-bed vehicles
- Presence time adjusts to infinity

RF 433

- Unique rolling code each time switch is activated
- Up to 100 transmitters can be programmed to a single receiver
- Up to 4 separate wireless receivers can be activated by a single transmitter
- Variable delay or no delay programming

Focus & Focus2

- Presence detection for safety utilizing infrared technology
- Detection zone can be angled and adjusted in length by potentiometer
- Distance measuring technology prevents any "false detections"
